NOTE 1 STATEMENT OF ACCOUNTING POLICIES

Reporting Entity and Statutory Base

Telecom Corporation of New Zealand Limited is a company registered in New Zealand under the Companies Act 1993, and is an issuer for the purposes of the Financial Reporting Act 1993.

The financial statements presented are those of Telecom Corporation of New Zealand Limited (the "Company" or the "Parent Company") its subsidiaries and associates (the "Telecom Group" or "Telecom").

Nature of Operations

Telecom is a major supplier of telecommunications services in New Zealand and Australia. Telecom provides a full range of telecommunications products and services including local, national, international and value-added telephone services, cellular and other mobile services, data and Internet services, equipment sales and installation services, leased services and directories.

Basis of Preparation

The financial statements have been prepared in accordance with the Financial Reporting Act 1993 which requires compliance with accounting practice generally accepted in New Zealand ("NZ GAAP"). This differs in certain significant respects from accounting practice generally accepted in the United States ("US GAAP"). For a description of the significant differences and related effect on these financial statements, see Note 30.

The financial statements are expressed in New Zealand dollars. The amounts pertaining to the most recent financial period are also expressed in United States ("US") dollars, the latter being presented solely for convenience and translated from New Zealand dollars, as a matter of arithmetical computation only, at a rate on 30 June 2000 of NZ\$1.00 to US\$0.4690. The US dollar amounts should not be construed as representations that the New Zealand dollars have been, could be, or could in the future be converted into US dollars at this or any other rate. References in these financial statements to "\$" and "NZ\$" are to New Zealand dollars, references to "US\$" are to US dollars and references to "A\$" are to Australian dollars.

Measurement Basis

The measurement basis adopted in the preparation of these financial statements is historical cost, modified by the revaluation of certain investments as identified in specific accounting policies below.

Specific Accounting Policies

Basis of Consolidation

Subsidiaries

Subsidiaries are those entities controlled, directly or indirectly, by the Telecom Group.

The consolidated financial statements are prepared from the accounts of the Company and its wholly and majority-owned subsidiaries using the purchase method of consolidation. All significant intercompany accounts and transactions are eliminated on consolidation.

Associates

Associates are entities in which the Telecom Group has significant influence, but not control, over the operating and financial policies.

Associate companies are reflected in the consolidated financial statements using the equity method whereby Telecom's share of the results of associates is included in consolidated net earnings attributable to shareholders.

Where the equity accounted carrying amount of an investment in an entity falls below zero, the equity method of accounting is suspended and the investment recorded at zero. If this occurs, the equity method of accounting is not resumed until such time as the Telecom Group's share of losses and reserve decrements, not recognised during the financial years in which the equity method was suspended, are offset by the current share of profits and reserves.

Goodwill Arising on Acquisition

Goodwill represents the excess of purchase consideration over the fair value of net assets acquired at the time of acquisition of a business or shares in a subsidiary or associate. Goodwill is amortised on a systematic basis over the period benefits are expected to arise, which will be no more than 20 years.

Acquisition or Disposal During the Year

Where an entity becomes or ceases to be a Telecom Group entity during the year, the results of that entity are included in the net earnings of the Telecom Group from the date that control or significant influence commenced or until the date that control or significant influence ceased.

Revenue Recognition

Telecom generally recognises revenues as it provides services or delivers products to customers. Billings for telecommunications services are made on a monthly basis throughout the month. Unbilled revenues from the billing cycle date to the end of each month are recognised as revenue during the month the service is provided. Revenue recognition is deferred in respect of the portion of fixed monthly charges that have been billed in advance.

Accounts Receivable

Accounts receivable are recorded at expected realisable value after providing for bad and doubtful accounts expected to arise in subsequent accounting periods.

Bad debts are written off against the provision for doubtful accounts in the period in which it is determined that the debts are uncollectable.

Inventories

Inventories principally comprise materials for self-constructed network assets, critical maintenance spares, customer premises equipment held for rental or sale and mobile equipment held for sale. Inventories are stated at the lower of cost and net realisable value after due consideration for excess and obsolete items. Cost is determined on a first-in first-out or weighted average cost basis.

'Investments

Long-term investments are stated at cost. Long-term investments include the Company's investment in subsidiaries.

Investments in associate companies are stated at the Company's share of the fair value of the net tangible assets at acquisition plus the share of post-acquisition movements in reserves.

Investments not expected to be held to maturity are stated at market value, with the resulting gains or losses taken to earnings.

Where, in the opinion of the Directors, there has been a permanent diminution in the value of investments this is recognised in the current period.

Fixed Assets

Fixed assets are valued as follows:

- The value of fixed assets purchased from the Government was determined on the basis of depreciated replacement cost using estimated remaining lives as at 1 April 1987.
- Subsequent additions are valued at cost. The cost of additions to plant and equipment and other fixed assets constructed by Telecom consists of all appropriate costs of development, construction and installation, comprising material, labour, direct overhead and transport costs.

NOTE 1 Statement of Accounting Policies (continued)

 For each fixed asset project, interest costs incurred during the period required to complete and prepare the fixed asset for its intended use are capitalised as part of the total cost.

Software Developed for Internal Use

Telecom capitalises the direct costs associated with the development of network and business software for internal use where project success is regarded as probable. Capitalised costs include external direct costs of materials and services consumed, payroll and direct payroll-related costs for employees (including contractors) directly associated with the project and interest costs incurred while developing the software. Software developed for internal use is depreciated over its useful life to the Telecom Group.

Depreciation

Depreciation is charged on a straight-line basis to write down the cost of the fixed assets to their estimated residual value over their estimated useful lives, which are as follows:

Telecommunications equipment and plant:

| Customer local access | 3-50 years |
|------------------------------------------|-------------|
| Junctions and trunk transmission systems | 10-50 years |
| Switching equipment | 3-15 years |
| Customer premises equipment | 3-5 years |
| Other network equipment | 4-15 years |
| Buildings | 40-50 years |
| Motor vehicles | 4-10 years |
| Furniture and fittings | 5-10 years |
| Computer equipment | 3-5 years |

Where the remaining useful lives or recoverable values have diminished due to technological change or market conditions, depreciation is accelerated or the assets are written down.

Land and capital work in progress are not depreciated.

Where a fixed asset is disposed of, the profit or loss recognised in the Statement of Financial Performance is calculated as the difference between the sale price and the carrying value of the fixed asset.

Leased Assets

Telecom is a lessor of customer premises equipment. Such leases are considered operating leases because substantially all the benefits and risks of ownership remain with Telecom. Rental income is taken to revenue on a monthly basis in accordance with the lease term.

Telecom is a lessee of certain plant, equipment, land and buildings under both operating and finance leases. Lease costs relating to operating leases are charged against earnings as incurred. Finance leases, which effectively transfer to Telecom substantially all the risks and benefits of ownership of the leased assets, are capitalised at the present value of the minimum lease payments. The leased assets and corresponding liabilities are disclosed and the leased assets are depreciated over the period Telecom is expected to benefit from their use.

Spectrum Licences

Costs incurred on the acquisition of spectrum licences are amortised from the date the underlying asset is held ready for use on a straight-line basis over the period of their expected benefit, which does not exceed fifteen years.

Debt

Debt is stated at face value less unamortised discounts, premiums and prepaid interest. Discounts, premiums and prepaid interest are amortised to interest expense on a yield to maturity basis over the period of the borrowing. Borrowing costs such as origination, commitment and transaction fees are deferred and amortised over the period of the borrowing.

Compensated Absences

The liability for employees' compensation for future absences, calculated on an actuarial basis, is accrued in respect of employees' services already rendered and where the obligation relates to rights that may eventually vest.

Research and Development Costs

Research and development costs are charged to earnings as incurred, except where, in the case of development costs, future benefits are expected beyond any reasonable doubt to exceed these costs. Where development costs are deferred, they are amortised over future periods on a basis related to the expected future benefits.

Taxation

The taxation expense charged to earnings includes both current and deferred tax and is calculated after allowing for permanent differences.

Deferred taxation calculated on a partial basis using the liability method is accounted for on timing differences between the earnings stated in the financial statements and the assessable income computed for taxation purposes. Deferred taxation is recognised only on those timing differences that are expected to crystallise within the foreseeable future.

Foreign Currency

Transactions

Transactions denominated in a foreign currency are converted at the New Zealand exchange rate at the date of the transaction. Foreign currency receivables and payables at balance date are translated at exchange rates current at balance date. Exchange differences arising on the translation of accounts payable and receivable in foreign currencies are recognised in the Statement of Financial Performance.

Exchange gains and losses and hedging costs arising on contracts entered into as hedges of firm commitments are deferred until the date of such transactions at which time they are included in the determination of net earnings.

Where capital project commitments are hedged against foreign currency rate risk, the exchange difference on the hedging transaction up to the date of purchase and all other costs associated with the hedging transaction are capitalised.

All exchange gains and losses relating to other hedge transactions are brought to account in the Statement of Financial Performance in the same period as the exchange differences on the items covered by the hedge transactions. Costs on such contracts are amortised over the life of the hedge contract.

Translation of Foreign Group Entities

Assets and liabilities of independent overseas subsidiaries are translated at exchange rates existing at balance date. The revenues and expenses of these entities are translated at rates approximating the exchange rates ruling at the dates of the transactions. The exchange gain or loss arising on translation is carried directly to a foreign currency translation reserve.

Derivative Financial Instruments

Telecom uses derivative financial instruments to reduce its exposure to fluctuations in foreign currency exchange rates and interest rates.

Telecom does not currently hold or issue derivative financial instruments for trading purposes. Gains and losses on derivatives are accounted for on the same basis as the underlying physical exposures. Accordingly, hedge gains and losses are included in the Statement of Financial Performance when the gains or losses arising on the related physical exposures are recognised in the Statement of Financial Performance.

NOTE 1 Statement of Accounting Policies (continued)

For an instrument to qualify as a hedge, it must be effective at reducing the risk associated with the exposure being hedged and must be designated as a hedge at the inception of the contract.

Derivative financial instruments that do not qualify or no longer qualify as hedges are stated at market values and any resultant gain or loss is recognised in the Statement of Financial Performance.

Interest rate swaps and cross currency interest rate swaps that hedge an underlying physical exposure are accounted for using the accrual method of accounting. Interest receivable and payable under the terms of the interest rate swaps and cross currency interest rate swaps are accrued over the period to which the payments or receipts relate, and are treated as an adjustment to interest expense or capital note distribution costs.

The foreign exchange gains and losses on the principal value of cross currency swaps are reflected in the Statement of Financial Performance using the spot rate which offsets the foreign exchange gains and losses recorded on the underlying hedged transaction.

Premiums paid for interest rate options and the net settlement on maturity of forward rate agreements are amortised over the life of the underlying hedged item.

Forward exchange contracts are accounted for as outlined in the accounting policy for foreign currency transactions.

Cash flows from derivatives are recognised in the Statement of Cash Flows in the same category as that of the hedged item.

Cash and Cash Equivalents

For the purposes of the Statement of Cash Flows, cash and cash equivalents are considered to be cash on hand and in banks, net of bank overdrafts. Cash flows from certain items are disclosed net, due to the short-term maturities and volume of transactions involved.

Earnings Per Share

Earnings per share is computed by dividing net earnings by the weighted average number of ordinary shares outstanding during each period.

Use of Estimates

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Annual Balance Date Change

Effective 1 April 1999, the Company changed its annual balance date from 31 March to 30 June. These financial statements include the transition period result for the three months ended 30 June 1999.

Reclassifications

Certain reclassifications of prior periods' data have been made to conform to current year classifications.

Changes in Accounting Policies

The accounting policies used in the preparation of the financial statements for the year ended 30 June 2000 are consistent with those used in the preparation of the published financial statements for the three month transition period ended 30 June 1999 and the year ended 31 March 1999.

| | | 339 | 324 | 66 | 437 | |

Parent Company

Operating revenues principally comprise dividends received from subsidiary companies.

NOTE 3 OPERATING EXPENSES

Labour

Included in labour costs are pension contributions of \$3 million to the Government Superannuation Fund (30 June 1999: \$1 million, 31 March 1999: \$4 million, 31 March 1998: \$5 million) and \$5 million on behalf of Australian employees as required by the Superannuation Guarantee (Administration) Act 1992. Telecom has no other obligations to provide pension benefits in respect of present employees. Telecom currently pays administration and management fees, insurance premiums and other expenses incurred with respect to employees' membership of the Telecom Retirement Savings Plan, but only members contribute to that plan.

Abnormal Revenues

Sale of AAPT Sat-Tel Pty Limited

In March 2000, AAPT Limited ("AAPT") completed the sale of its wholly owned subsidiary AAPT Sat-Tel Pty Limited to New Skies Networks Australia Pty Limited. Included in the Consolidated Statement of Financial Performance are post acquisition profits relating to this sale, before minority interests, of \$15 million.

Cross Border Lease

During the three months ended 30 June 1999, a gain of \$15 million was recognised on the prepayment of Telecom's scheduled payment obligations relating to a cross border finance lease.

Liquidation of the Executive Share Ownership Plan (the "Executive Plan")

The liquidation of the Executive Plan was completed in March 1999. The Trustee of the Executive Plan had disposed of the 1.9 million unallocated shares held on trust and remitted the net proceeds to Telecom as the residuary beneficiary. The net proceeds received were \$16 million.

Abnormal Expenses

Onerous Contract Buy-out Costs

During the three months ended 30 June 1999, the costs of buying out the terms of certain onerous contracts were identified and provided for. The contracts were onerous as the unavoidable costs of meeting the contractual obligations exceeded their economic benefits.

NOTE 4 Abnormal Items (continued)

Restructuring

During the year ended 31 March 1999, Telecom reached an agreement with specialist call centre operator SITEL Asia Pacific to contract out the provision of operator services. The decision to outsource operator services resulted in approximately 560 redundancies at a cost of \$15 million.

Discontinuance of HFC Roll-out & Closure of First Media Limited ("First Media")

During the year ended 31 March 1998, Telecom identified and provided for the estimated costs associated with the termination of the residential hybrid fibre/coax cable roll-out and the closure of First Media, a cable television operator.

| Supplementary dividend tax credit | 26 | | 25 | 26 | | 25 |
| _ | _ | (25) | (13) | 26 | - | 25 |

At 30 June 2000, a deferred tax asset of \$7 million (30 June 1999: \$6 million, 31 March 1999: \$6 million), in respect of timing differences relating to depreciation on buildings, has not been recognised.

In accordance with the Income Tax Act 1994, Telecom received tax credits from the Inland Revenue Department equivalent to the supplementary dividends paid. Included as a deferred tax asset is \$25 million representing a tax credit due on the payment of supplementary dividends that will be paid in conjunction with the fourth quarter dividend.

AAPT has not recognised in its deferred taxation balance the tax effect of accumulated losses amounting to A\$7 million (based on the Australian corporation tax rate of 34%). Obtaining the benefits of these tax losses is dependent upon deriving sufficient assessable income, meeting conditions for deductibility and complying with Australian tax legislation.

NOTE 7 DISCONTINUED OPERATIONS

Telecom announced on 22 July 1996 that it was reviewing the operations of those of its Australian subsidiaries which formed the Pacific Star Group ("Pacific Star") at which time a formal plan of disposal or wind-down of the Pacific Star businesses was approved by the Board.

The winding down of Pacific Star operations progressed satisfactorily resulting in a reduction in the provision for loss on disposal of Pacific Star by \$30 million at 31 March 1998. The process of winding down the discontinued Pacific Star operations was completed during the year ended 30 June 2000.

Telecom Group

Shares in Listed Companies

During the year ended 30 June 2000, Telecom purchased a 10% stake in Independent Newspapers Limited ("INL") and a 2% stake in eVentures Limited ("eVentures"). At 30 June 2000 the market values of Telecom's investments in INL and eVentures were \$155 million and \$3 million respectively.

During the three months ended 30 June 1999, Telecom purchased a 19.7% stake in AAPT. At 30 June 1999 the market value of Telecom's investment in AAPT was NZ\$337 million. On 27 November 1999 Telecom purchased an additional 61.7% shareholding in AAPT, bringing the total shareholding at that date to 81.4%.

| Net book value at 31 March 1999 | 2,956 | 187 | 111 | 294 | 232 | 3,780 |

Values Ascribed to Land and Buildings

Telecom's properties consist primarily of special-purpose network buildings, which form an integral part of the telecommunications network. The Directors estimate that the fair valuation of land and buildings (excluding properties designated for disposal) is approximately equivalent to their net book value as at 30 June 2000, taking into account their integral value to the network.

Included in land and buildings at 30 June 2000 are properties held for sale at their estimated realisable value of \$11 million (30 June 1999: \$13 million, 31 March 1999: \$12 million).

Operating Leases

Included in telecommunications equipment at 30 June 2000 is equipment (principally customer premises equipment) leased to customers under operating leases with a cost of \$303 million (30 June 1999: \$284 million, 31 March 1999: \$282 million) together with accumulated depreciation of \$272 million (30 June 1999: \$260 million, 31 March 1999: \$260 million).

Included in buildings at 30 June 2000 are buildings on leasehold land with a cost of \$11 million (30 June 1999: \$9 million, 31 March 1999: \$9 million) together with accumulated depreciation of \$2 million (30 June 1999: \$2 million, 31 March 1999: \$2 million).

Finance Leases

Included in telecommunications equipment at 30 June 2000 are assets capitalised under finance leases with a cost of \$541 million (30 June 1999: \$576 million, 31 March 1999: \$376 million, 31 March 1999: \$376 million, 31 March 1999: \$204 million).

Land Claims

Under the Treaty of Waitangi Act 1975, all interests in land included in the assets purchased from the New Zealand Government may be subject to claims to the Waitangi Tribunal, which has the power to recommend, in appropriate circumstances, with binding effect, that the land be resumed by the Government in order that it be returned to Maori claimants. In the event that the Government resumes land, compensation will be paid to Telecom under the provisions of the Public Works Act 1981. If this is insufficient to cover the loss, certain additional compensation is payable under the provisions of the Sale and Purchase Agreement between the Company and the Government.

Under the State Owned Enterprises Act 1986, the Governor General of New Zealand, if satisfied that any land or interest in land held by Telecom is Wahi Tapu (being land of special spiritual, cultural or historical tribal significance), may declare by Order in Council that the land be resumed by the Government, with compensation payable to Telecom under the provisions of the Public Works Act 1981. Telecom would expect to negotiate with the new Maori owners for continued occupancy rights of any sites resumed by the Government.

Onerous Contracts

During the three months ended 30 June 1999, estimated costs of \$22 million to buy-out the terms of certain onerous contracts were identified and provided for During the year ended 30 June 2000 costs of \$14 million were charged against this provision.

Restructuring

A strategic restructuring of Telecom was announced towards the end of the 1993 financial year. It was estimated that the cost of implementing this restructuring would be \$450 million. This was provided for in the fourth quarter earnings of the year ended 31 March 1993 as an abnormal restructuring cost. During the year ended 30 June 2000, costs of \$5 million were charged against this provision. As at 30 June 2000, the balance of this provision was \$6 million (30 June 1999; \$11 million, 31 March 1999; \$12 million), the majority of which relates to expected losses on disposal of surplus freehold properties.

A strategic restructuring, aimed at improving service and reducing operating costs, was finalised in the fourth quarter of the 1997 financial year. In addition, restructuring costs arising out of the Performance 2000 project, aimed at substantially reducing Telecom's operating costs, had been identified as at 31 March 1997. All of these restructuring costs, amounting to \$65 million, were provided for in the fourth quarter results of the year ended 31 March 1997. During the year ended 30 June 2000, redundancy and other restructuring costs of \$17 million were charged against this provision. As at 30 June 2000, the balance of this provision was nil (30 June 1999: \$17 million, 31 March 1999: \$18 million).

Redundancy costs of \$15 million resulting from the outsourcing of operator services were identified and provided for during the year ended 31 March 1999. The remaining balance of this provision (31 March 1999: \$7 million) was paid out during the three months to 30 June 1999.

Year 2000

The operating costs of making the modifications necessary to maintain functionality into the year 2000 and beyond was estimated at \$87 million and a provision raised at 31 March 1997. This provision had been fully utilised by 30 June 2000.

NOTE 16 DEBT DUE WITHIN ONE YEAR

| • | | Telecom Group | | |
|--------------------------------------------------------|-----------------------|---------------|-------|-------|
| | 31 N | 31 March | 30 | June |
| | | 1999 | 1999 | 2000 |

| | | 953 | 817 | 1,274 |
| | | 1,130 | 1,064 | 1,462 |
| | | | | |

The weighted average interest rates at 30 June 2000 (inclusive of the effects of hedging) were 6.20% for commercial paper and 6.73% for notes (30 June 1999: 4.56% and 4.65%, 31 March 1999: 4.45% and 4.33% respectively).

Commercial paper comprises amounts issued under Telecom's US\$750 million European Commercial Paper Programme and Telecom's \$200 million Asian Commercial Paper Programme. Issues outstanding at 30 June 2000 are denominated in NZ dollars, US dollars, Swiss francs and Euros and are stated inclusive of the effect of hedging transactions.

Notes comprise amounts issued under Telecom's \$500 million note facility.

As at 30 June 2000 Telecom had a committed stand-by credit facility of \$1,600 million with the major New Zealand trading banks (this facility was cancelled on 31 July 2000), and access to US\$200 million of committed short-term funding through a standby facility. Telecom also had committed overdraft facilities of \$20 million with New Zealand banks. In addition AAPT had access to an undrawn committed facility with a major Australian trading bank of A\$60 million at 30 June 2000. There are no material compensating balance requirements associated with these facilities.
